

#### Published: 10.03.2022, version 1.0

#### **Key considerations:**

- We have been through two exhausting years of this pandemic. This should have been enough for NHSE&I to recognise the need to rebase any five year 'settlement' introduced in 2019, just one year before the pandemic hit.
- The GP contract changes described in <u>B1375</u> were not agreed with GPC England, therefore this contract is being imposed upon the profession.
- The PCN DES forms part of a five-year deal ending in March 2024.
- Full service specifications for the PCN DES 2022/23 are not yet published.

### **Opening statements**

| Page/<br>section | NHS England text (highlights added)   | Comments   |
|------------------|---|--|
| Pg 2,<br>para 3a | <b>Online Booking</b><br>It will be replaced with a more targeted<br>requirement that all appointments which do<br>not require triage are able to be booked<br>online, as well as in person or via the<br>telephone.  | This is unclear. However, practices are advised<br>that they should continue to determine which<br>appointments "require triage", what form that<br>triage should take, and who conducts it.<br>Practices should continue to provide services<br>according to patient need in accordance with<br>their contract. |
| Pg 2,<br>para 3b | Patient Records<br>To require GP practices to respond to <u>Access</u><br>to <u>Health Records Act</u> (AHRA) requests for<br>deceased patients and to remove the<br>requirement for practices to always print and<br>send copies of the electronic record of<br>deceased patients to Primary Care Support<br>England (PCSE). | This may or may not reduce administrative burden on practices.   |
| Pg 2,<br>para 3d | SARs<br>There will also be continuation of funding in<br>Global Sum (£20 million) for one additional<br>year (2022/23) to reflect workload for<br>practices from Subject Access Requests<br>(SARs).   | Subject to further detail, this may be positive considering the increased workload of SARs.  |

|-----------------|---|---|
| section         |   |   |
| Pg 3,<br>para 1 | No new indicators will be added to QOF<br>when the temporary income protection<br>arrangements come to an end in March<br>2022. The Quality Improvement (QI) modules<br>for 2022/23 will focus on optimising patients'<br>access to general practice and prescription<br>drug dependency.                           | We have called for QoF protection to remain in<br>place. It is unacceptable that this has not been<br>continued when the profession is in such crisis.<br>Identifying optimised access targets as a<br>metric is unreasonable when the true issue is<br>capacity.   |
| Pg 3,           | PCNs have made excellent progress in  | This statement is counter to evidence shared  |
| para 2          | recruiting to roles under the Additional Roles<br>Reimbursement Scheme (ARRS). The national<br>target is 15,500 FTEs by the end of 2021/22.<br>Based on NHS Digital (NHSD) data and NHS<br>England and NHS Improvement ARRS<br>financial returns we are confident that we<br>are on track to achieving that target. | across London's LMCs and practices. Recent<br>trade press reports based on information<br>sourced from PCNs across <u>England found that</u><br><u>ARRS recruitment was falling far short</u> . This<br>was <u>confirmed by the RCGP</u> . Despite national<br>promotion of the ARRS scheme, over 50% of<br>London practices still report clinical vacancies<br>for GPs and nurses (via the 6 monthly<br><u>Londonwide LMCs workforce survey</u> ),<br>alongside issues about recruitment, training<br>and deployment of additional roles, and<br>concerns that workforce and patient demand<br>continue to rise. |
| Pg 3,           | The amount available for PCNs to recruit  | There is no perceived value in pushing for  |
| para 3          | additional staff will increase as promised by<br>£280 million to just over £1 billion for<br>2022/23. We continue to encourage PCNs to<br>make full use of their ARRS entitlements.   | further ARRS recruitment when staff for the<br>roles either do not exist in sufficient numbers,<br>or at sufficient levels, or do not provide<br>enough benefit.  |
| Pg 3,<br>para 4 | The PCN Clinical Director funding for 2022/23<br>has been agreed as £0.736 per head or £44m<br>nationally as part of the five-year deal. We<br>confirm that this funding will be boosted by a<br>further £43 million.   | This is misleading as it suggests that the<br>funding for 2022/23 has been uplifted twice.<br>We presume this is a typo and that "2022/23"<br>should read "2021/22" as this amount of<br>£0.736 was agreed in 2021, to apply to the<br>2021/22 DES specifications (see page 62).<br>We also presume "£44m" is a typo as this was<br>£43m according to NHS England's<br>own communication from August 2021 (see<br>page 3).  |
|                 |   | We read this section as being a continuation of<br>the previous 2021/22 status quo on CD<br>funding, and that the increased amount will<br>continue for a further year, which is positive.  |

| section         |  |   |  |
| Pg 3,<br>para 5 | As agreed in the 2019 deal and subsequent<br>updates, we will bring together, under the<br>Network Contract DES, the two funding<br>streams currently supporting extended<br>access to fund a single, combined and<br>nationally consistent access offer with<br>updated requirements, to be delivered by<br>PCNs. | The reference to "updated requirements" is<br>concerning as this indicates increased<br>workload/demands whilst the original funding<br>envelope remains static. Further detail on this<br>aspect is annotated below in comments on<br><u>Annex A</u> . |  |
| Pg 4,           | There will be a <mark>limited expansion</mark> of the  | The paperwork is lacking detail of the  |  |
| para 2          | Cardiovascular Disease Prevention and  | referenced "limited expansion". No detail   |  |
|                 | Diagnosis service.   | appears in the annexes.   |  |
| Pg 4,           | We are now further re-phasing published  | It is welcome that Anticipatory Care services   |  |
| para 3          | plans in two ways. First, PCNs will have an  | will not start until April 2023, and Personalised   |  |
|                 | additional year to implement digitally   | Care will not be a requirement until the end of   |  |
|                 | enabled personalised care and support  | 2023/24. However, it remains to be seen how   |  |
|                 | planning for care home residents. 2022/23  | much workload this will require and we await  |  |
|                 | will now become a preparatory year, with   | details in the service specifications.  |  |
|                 | implementation of the requirement required   |   |  |
|                 | <mark>by 31 March 2024</mark> . Second, there will be an   |   |  |
|                 | extension of the period that PCNs have to  |   |  |
|                 | develop their anticipatory care plans until  |   |  |
|                 | December 2022. The Anticipatory Care   |   |  |
|                 | service itself, which will be ICS led, will start  |   |  |
|                 | <mark>in 2023/24</mark> .  |   |  |
| Pg 4,           | Three new Investment and Impact Fund (IIF)   | Making FIT testing an IIF target for all lower GI   |  |
| para 5          | indicators focused on Direct Oral  | 2ww referrals could undermine agreed cancer   |  |
|                 | Anticoagulants (DOAC) prescribing and FIT  | pathways which state that FIT testing is not  |  |
|                 | testing for cancer referrals will be introduced  | mandatory, especially where it will delay   |  |
|                 | in 2022/23.  | referral.   |  |
| Pg 5,           | The current five-year framework of GMS   | This defines the whole five year agreement  |  |
| para 1          | contract changes, agreed by GPC England  | introduced in 2019 as the "GMS contract" and  |  |
|                 | concludes at the end of 2023/24. The default   | states the intention that this will   |  |
|                 | position is that the existing GMS contract will  | "automatically roll forwards unless it is   |  |
|                 | automatically roll forwards unless it is   | changed." This is concerning as it marks an   |  |
|                 | changed.   | intention for PCNs to continue beyond 2024.   |  |

| Page/<br>section | NHS England text (highlights added)  | Comments   |
|------------------|--|--|
| Pg 5,<br>para 2  | In considering options for any future<br>potential changes to the national GMS<br>contract, NHS England and NHS Improvement<br>and DHSC will engage with a range of NHS<br>organisations including the new Integrated<br>Care Boards who will be responsible for<br>commissioning primary care services; and<br>patient and professional representative<br>groups. | It is concerning that NHS England list a wide<br>range of other organisations before<br>mentioning consulting the profession itself on<br>GMS contract changes.<br>It is unclear whether similar broad<br>consultations are intended for contracts/<br>contractual changes for other providers and<br>services across the health landscape. It is also<br>unclear why this section references GMS<br>contracts and not PS or APMS contracts. |
| Pg 5,<br>para 3  | NHS England and NHS Improvement confirms<br>that it remains fully committed to discussing<br>any proposals for potential future national<br>changes from 2024/25 with GPC England.   | In light of the contract imposition in 2022/23,<br>the word "discuss" instead of "negotiate" or<br>"agree" with regard to contractual changes for<br>2024/25 is concerning.  |

### Annex A – enhanced access:

The "Enhanced Access" referred to here is the new combination of the following two separate services which, as of October 2022, will become a single network obligation under the DES:

- "Extended Hours" (prior to 2019 this was a practice level DES; later rolled into the PCN DES at network level).
- "Improved Access" or "Extended Access" (a CCG commissioned service delivered in various ways).

| Section | NHS England text (highlights added)           | Comments   |
|---------|---|--|
| 1       | From 1 October 2022, PCNs will be required    | This would appear to be open to interpretation     |
|         | to provide Enhanced Access between the        | as provision of service within these hours as      |
|         | hours of 6.30pm and 8pm Mondays to            | opposed to <u>across</u> these hours.              |
|         | Fridays and between 9am and 5pm on            |  |
|         | Saturdays.                                    |  |
| 2       | To prepare for delivery of Enhanced Access    | Reflecting the diversity found across, and even    |
|         | from 1 October 2022, PCNs must work with      | within, London's LMC areas, these plans            |
|         | their commissioner to produce and agree an    | should be formulated at a local level under a      |
|         | Enhanced Access Plan. This plan will need to  | light touch approach, rather than the one-size-    |
|         | set out how the PCN is planning to deliver    | fits-all checklist that NHSE&I gives from 2 (i) to |
|         | Enhanced Access from October.                 | (vii).   |
| 3       | PCNs must submit their draft Enhanced         | Producing a joined-up ICS service will be a        |
|         | Access Plan to their commissioner by 31 July, | challenge for commissioners but is not the         |
|         | with a final iteration agreed by 31 August.   | responsibility of practices or PCN CDs to plan/    |
|         | Commissioners will need to ensure the PCN     | coordinate beyond their respective areas.          |
|         | Enhanced Access Plans form part of a          |  |
|         | cohesive ICS approach.                        |  |

| Section     | NHS England text (highlights added)                                  | Comments  |
|-------------|--|---|
| 4           | PCNs will be required to provide enhanced                            | The phrase "Network Standard Hours"   |
|             | access between the hours of 6.30pm and                               | suggests a direction of travel towards the  |
|             | 8pm Mondays to Fridays and between 9am                               | return of OOH provision (even if on a shared  |
|             | and 5pm on Saturdays (known as "Network                              | basis) which the 2004 contract removed, at a  |
|             | Standard Hours").  | negotiated financial deficit to practices. We   |
|             |  | are clear that there is a distinction between   |
|             |  | standard hours across the network, and core   |
|             |  | contractual hours within general practice.  |
| 5 (i)-(iii) | PCNs will be required to provide bookable                            |   |
|             | appointments during the Network Standard                             |   |
|             | Hours which are:   |   |
|             | i. available to the PCN's registered                                 |   |
|             | patients   |   |
|             | ii. are for any general practice services                            | (ii) The appointments should be for " <mark>any</mark>  |
|             | iii. for bookable appointments, that may                             | general practice services" which the practice   |
|             | be made in advance or on the same                                    | feels are appropriate/necessary for their   |
|             | day, regardless of the access route via                              | patients. (NB: "any" does not mean "all".)  |
|             | which patients contact their practice,                               |   |
|             | and the PCN must   |   |
|             | a) make the appointments available                                   | (a) The requirement for appointments to be  |
|             | a minimum of two weeks in  | "bookable" and "utilising appropriate triage" is  |
|             | advance, with the PCN's Core   | contradictory. We interpret this as "bookable"  |
|             | Network Practices utilising  | by the GP/clinician/practice following triage,  |
|             | appropriate triage and/or  | where the practice thinks an appointment is   |
|             | navigation as required to book                                       | appropriate.  |
|             | and/or offer patients available                                      |   |
|             | appointments<br>b) make the Network Standard                         | (b) Each practice in the DCN should be able to  |
|             |  | (b) Each practice in the PCN should be able to  |
|             | Hours appointment book   | access the appointment book.  |
|             | accessible to its practices to                                       |   |
|             | enable efficient patient bookings                                    |   |
|             | into slots following patient   |   |

|         | v.             | within Network Standard Hours and   |   |
|         |                | are:  |   |
|         |                | <ul> <li>a mixture of in person face to face<br/>and remote (telephone, video or<br/>online) appointments, provided<br/>that the PCN ensures a reasonable<br/>number of appointments are<br/>available for in person face-to-<br/>face consultations to meet the<br/>needs of their patient population,<br/>ensuring that the mixture of<br/>appointments seeks to minimises<br/>inequalities in access across the</li> </ul> | (a) In order to provide a "mixture" which<br>includes a "reasonable number" of different<br>modalities and types of consultations which<br>"minimise inequalities in access," we advise<br>practices to use their discretion and provide a<br>mixture not dissimilar to their mid-week<br>services. |
|         |                | patient population  |   |
|         |                | <ul> <li>b) in locations that are convenient<br/>for the PCN's patients to access in<br/>person face-to-face services; and</li> </ul>   | (b & c) Delivered in sites and locations no less<br>numerous or local than how they have been<br>delivered by CCG commissioned services.  |
|         |                | <ul> <li>c) delivered from premises which<br/>are is as a minimum equivalent to<br/>the number of sites within the<br/>PCN's geographical area from<br/>which the CCG Extended Access<br/>Service was delivered.</li> </ul>   |   |
| 5 (vi)  | vi.            | providing a minimum of <mark>60 minutes of<br/>appointments per 1,000 PCN adjusted</mark>   | For a sample 50k patient PCN:   |
|         |                | patients per week during the Network<br>Standard Hours, calculated using the<br>following formula:  | 50,000 ÷ 1,000 x 60 = 3,000 minutes (50hrs)<br>per week.  |
|         |                | onal minutes* = the PCN adjusted<br>ation** ÷ 1,000 x 60  |   |
|         | either<br>hour | rert to hours and minutes and round,<br>up or down, to the nearest quarter  |   |
|         |                | N adjusted population is based on the<br>Primary Medical Care weighted  |   |
|         |                | ation as at 1 January 2022  |   |

| Section | NHS England text (highlights added)   | Comments  |
|---------|---|---|
| 6       | If agreed with the commissioner, a<br>proportion of the Enhanced Access minutes<br>may be provided outside of the Network<br>Standard Hours, where it is evidenced by the<br>PCN that such appointments would better<br>meet the needs of the PCN's patients. For<br>example, this could be through the provision   | Where there is demonstrable need (eg. where<br>it has already been happening) PCNs may, in<br>agreement with the commissioner, provide a<br>proportion of these required services outside<br>the "Network Standard Hours," including<br>(where demand is "regularly high") during core<br>hours.                      |
|         | of a morning clinic between 7am to 8am, or<br>by exception a proportion of capacity may be<br>used to support management of demand<br>during core hours, where this is regularly<br>high.   | As demand is demonstrably regularly<br>extremely high throughout the week, the LMC<br>will support practices in calling for some of<br>these hours to be at the busiest times of the<br>week, as defined by practices.  |
| 7       | PCNs must ensure GP cover during the<br>Network Standard Hours, providing in person<br>face-to-face consultations, remote<br>consultations, leadership, clinical oversight<br>and supervision of the multi-disciplinary<br>team (MDT).  | The GP member of the MDT should provide a variety of consultations, no different to how they do during in-hours practice.   |
| 8       | PCNs must actively communicate availability<br>of these enhanced access appointments to<br>their patients, including informing patients<br>how they can be accessed, what and when<br>specific services are available (for example<br>vaccinations and immunisations, screening,<br>health checks, PCN services etc) and what<br>and when different members of the MDT are<br>available, through promotion and publication<br>through multiple routes. This may include the<br>NHS website (nhs.uk), the practice leaflet,<br>the practice website, on a waiting room<br>poster, by writing to patients and active<br>offers by staff booking appointments. | As per the GMS contract, practices should<br>meet the reasonable needs of patients who<br>are "ill or believe themselves to be ill" and<br>should use their own discretion in utilising<br>these appointments according to need, in a<br>manner to be determined by the practice in<br>consultation with the patient. |
| 9       | PCNs must ensure, when available,<br>appropriate telephony and IT interoperability<br>will operate between the practices of the<br>PCN, as well as any other parties involved,<br>such as sub-contracted providers.   | In much the same way that practices currently communicate and data share in their PCNs.   |

### Annex B – Updated Early Cancer Diagnosis service requirements 2022/23

Service specifications for Early Cancer Diagnosis have already been introduced for 2021/22. The communication B1375 by NHSE&I updates these requirements, however this is pending formal updated service specifications. We summarise below what appears to have been added.

| Section | NHS England text (highlights added)  | Comments   |
|---------|--|--|
| 1       | Review referral practice for suspected and<br>recurrent cancers, and work with their<br>community of practices to identify and<br>implement specific actions to improve<br>referral practice, particularly among people<br>from disadvantaged areas where early<br>diagnosis rates are lower.  | There is a new emphasis on reducing<br>inequalities, which was one of the targets set<br>out in the original 2019 five year deal.  |
| 2       | <ul> <li>Work with its core network practices to adopt and embed: <ul> <li>i. the requesting of FIT tests where appropriate for patients being referred for suspected colorectal cancer; and,</li> <li>ii. where available and appropriate, the use of tele-dermatology to support skin cancer referrals (tele-dermatology is not mandatory for all referrals).</li> </ul> </li> </ul> | As mentioned in comments on <u>Pg 4, Para 5</u><br>above, FIT tests are already part of the agreed<br>process in some areas but are not mandatory.<br>This spec appears to undermine that process,<br>as well as adding it to IIF.<br>Tele-dermatology to be introduced but we<br>emphasise this is not mandatory. |
| 3       | Focusing on prostate cancer, and informed<br>by data provided by the local cancer alliance,<br>develop and implement a plan to increase<br>the proactive and opportunistic assessment<br>of patients for a potential cancer diagnosis in<br>population cohorts where referral rates have<br>not recovered to their pre-pandemic<br>baseline.   | This increase in "opportunistic assessment"<br>has potential to cause a further large excess of<br>workload. We await further details in the<br>specifications.  |
| 5       | Review use of their non-specific symptoms<br>pathways, identifying opportunities and<br>taking appropriate actions to increase<br>referral activity.   | Londonwide LMCs will work with<br>commissioners at pan London, ICS and local<br>LMC level in our interface meetings to push for<br>an improvement in non-specific symptom<br>pathways to remove 2ww obstructions which<br>currently exist.   |

### Annex C – Investment and Impact Fund (IIF)

Thresholds, points, and maximum payment per average PCN for the three new indicators are summarised below (based on 1,250 PCNs in England). Note: that the Access and SMR IIF indicators were announced in the August 2021 contract update, but with no detail on thresholds.

| Indicator | Requirement   | Thresholds           | Points | Max<br>funding |
|-----------|---|----------------------|--------|----------------|
| CVD-12    | Percentage of patients on the QOF Atrial Fibrillation register and with a CHA2DS2-VASc score of 2 or more (1 or   | Upper: 95%           | 66     | £11,840        |
|           | more for patients that are not female), who were<br>prescribed a direct-acting oral anticoagulant (DOAC), or,<br>where a DOAC was declined or clinically unsuitable, a<br>Vitamin K antagonist. | Lower: 70%           |        |                |
| CVD-15    | Number of patients that were prescribed Edoxaban, as a percentage of patients on the QOF Atrial Fibrillation  | Upper: 60%           | 66     | £11,840        |
|           | register and with a CHA2DS2-VASc score of 1 or more for<br>men or 2 or more for women and who were prescribed a<br>DOAC.  | Lower: 40%           |        |                |
| CAN-10    | Percentage of lower gastrointestinal two week wait (fast track) cancer referrals accompanied by a faecal  | Upper: 80%<br>Lower: | 22     | £4,000         |
|           | immunochemical test result, with the result recorded<br>either in the seven days leading up to the referral, or in the<br>14 days after the referral.   | 2022/23 =<br>40%     |        |                |
|           | Comment: We interpret this as meaning that FIT testing does not need to delay referral and indeed can be  | 2023/24 =            |        |                |
|           | requested but not completed when the referral is done.  | <mark>65%</mark>     |        |                |

| Indicator | Requirement  | Thresholds   | Points | Max<br>funding |
|-----------|--|--|--------|----------------|
| ACC-02    | Number of online consultation submissions received by the PCN per 1000 registered patients (per week).                       | 5 per 1000<br>patients<br><mark>(25 in avg.</mark><br>PCN) | 18     | £3,280         |
| SMR-01    | Percentage of patients eligible to receive a Structured<br>Medication Review who received a Structured Medication<br>Review. | Upper: 62%<br>Lower: 44%                                   | 53     | £9,600         |

With thanks to our colleagues at BBO LMC for their assistance and analysis of the contract documents. As always, please do not hesitate to contact us for support, advice or assistance of any kind on the challenges within this contract, or if you have any questions, at <u>info@lmc.org.uk</u>.
